April 1, 2020

Mr. Michael Scheid
Division Manager
Skyline Homes
99 Horseshoe Road
Leola, PA 17540

Mr. Scheid,

This letter is in response to my March 30, 2020 telephone conversation with Mr. Craig Ditzler of your office. That conversation concerned model number SM373-4. The serial number of this home is 241-000-H-A000206BSC. This model has a “Dual-Quad” floor frame construction. A home that has the Dual-Quad floor frame system is intended to be set on a permanent foundation.

Mr. Ditzler has informed me that the local authority thinks this home is a Modular home. This home is, in fact, a Manufactured home built to the Federal Manufactured Home Construction and Safety Standards (MHSCC – 24 CFR 3280). This standard is more commonly known as the HUD code.

Each transportable section of the home will have a certification label. The certification label is a permanent label that is 2 inches by 4 inches in size and is typically located at the rear of each section. Each label has numbers that identify the 3rd party inspection agency and is evidence that this home is in compliance with the MHCSS.

Also, each home will have a Data Plate. The Data Plate is affixed in a permanent manner inside the home and is the size of a standard sheet of paper (8-1/2” x 11”). The Data plate is typically located in the master bedroom closet, or adjacent to the main panel board. The data plate will contain the manufacturer’s name and address, serial number for each home section and a statement that the home is designed to comply with the MHCSS. The Data Plate is further evidence that the home complies with the MHCSS.

I have attached a copy of the DAPIA approved floorplan to the letter. I have also attached the Skyline Homes setup addendum for the Dual-Quad floor frame system.

I trust this information will meet your needs. Please contact me if your require any additional information.

Sincerely,

Jeffrey T. Legault, P.E.
Director – Product Design & Engineering
