## Description

The Saltwater LX redefines the standards of beauty and inner strength. This high tech resin model offers an innovative design that's never been seen in above ground pools before. Each piece of the 8" curved top seats fits precisely into the next with a fully integrated flexible joint. Your expectations are sure to be exceeded by this sleek, leading edge pool that struts its stuff with such utter elegance. Saltwater LX has developed advanced coating techniques that will eliminate corrosion of the pool. The pool wall is coated with Duratex 2000 anti-corrosion paint, to protect against humidity and chemicals. The Saltwater LX has a unique stainless steel service panel that protects the skimmer and return lines from rust and corrosion. So you get a high-value pool without the high price tag—and a pool that will have you splashing, for years to come!
